

# EDIT SUITE TECHNICAL FEATURES

»»AHEAD OF TIME  
SINCE 1969««

Especially for editing music events we offer a multi-cam-solution where all cameras are displayed on one monitor and can be cut in realtime by using a touch screen. All servers, storage systems and workstations are connected via Fibre-Channel switch. The lowest speed of these components is 8 Gbits. All storage enclosures are working with the Quantum Store Next file system.

To interconnect with external devices for material delivery we offer the following alternatives:

- Fibre Channel 8 Gbit
- eSATA
- USB 2.0 , 3.0
- Firewire 400 and 800
- Ethernet up to 1 Gbit

Our workstations are designed for maximum performance to guarantee a stress-free post-production. In our Edit Suite we can restore, color grade and cut almost any format.

A few of the main formats we can process are:

- HD 1080i (50 / 60 fps)
- HD 1080p (23,97 – 60 fps)
- UHD (23,97 – 60 fps)
- 4K (23,97 – 60 fps)

## **Post Production Hardware**

**DVS Clipster  
Mac Pro  
PC Workstation**

## **Post Production Software**

**Avid Media Composer  
Adobe CC  
DaVinci Resolve 11  
Final Cut Studio**

## **Storage Systems**

**DVS Spycerbox with 60TB space  
RaidDeluxe Storage Encl. with 168 TB space**

## **Miscellaneous**

**Blackmagicdesign Studio Switch  
Tangent Devices Elements Panel  
Wacom Intuos Pro Tableau  
Digi Beta Player/Recorder  
2x BluRay Player**

## **Screening Solution**

**LG 84" UHD Monitor (3D)  
Samsung 64" HD Monitor  
LG 46" HD Monitor (3D)**

## **Audio Monitoring System**

**KS Digital complete System 2.0  
Teufel THX 5.1 System**
