

**STUDIO III
TECHNICAL FEATURES**

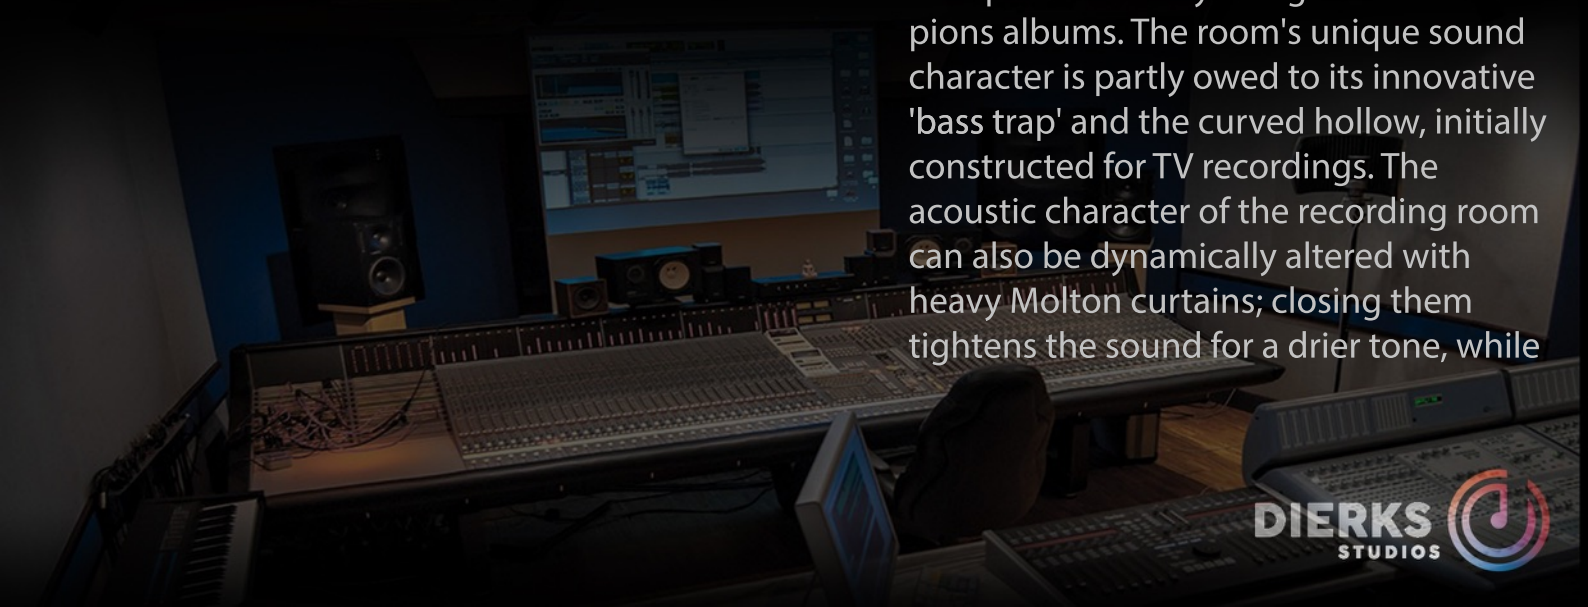

**»»AHEAD OF TIME
SINCE 1969««**

Step into the legendary world of Studio 3 at Dierks Studios, where history and innovation collide in a space that has shaped the sound of generations. Studio 3 is not just a recording area; it's a treasure trove of musical history, where the iconic Scorpions albums were born and the powerful drum sound of Herman Ra-rebell was meticulously crafted during night-long sessions

The recording room of Studio III is a place of legend. Spanning 100 square meters with a ceiling height of 5.50 meters, its sophisticated acoustics have been the birthplace of nearly all significant Scorpions albums. The room's unique sound character is partly owed to its innovative 'bass trap' and the curved hollow, initially constructed for TV recordings. The acoustic character of the recording room can also be dynamically altered with heavy Molton curtains; closing them tightens the sound for a drier tone, while

Mixing Console
